

Intro

Thank you for agreeing to take part in our research study. My name is {Your Name}. Did you have a chance to review the study disclosure form?

Today we'll be reviewing some work that is part of some coursework that I'm doing at the California College of the Arts. Your feedback will help inform future product directions. It will take approximately 30 mins. If at any time you need to pause or stop the session at all for whatever reason, please let me know.

During the session, I will ask you to use this product that is in development, you might need to stand up and do a form of exercise. Keep in mind that things do not work as expected. Please try to think out loud while you're doing the different activities. Just tell me whatever is going through your mind. Please know that we're not testing you, and there is no such thing as a wrong answer. Honesty is appreciated and won't hurt my feelings. I'm a neutral evaluator.

If it's okay with you, may I record today's session for note taking purposes? It will be deleted by the first week of May.

Do you have any questions before we begin?

Reminders

- Make sure everyone on your team has a printed copy of the Test Script after any revisions have been made.
- **Don't forget to hit record once they consent to it.**
- Remind participants the day before of the study session of any devices they will need to use the prototype. For example: mobile device vs. computer
- Make sure to share the prototype link if conducting the study remotely.
- If doing it in-person, make sure to have a device that the participant can access the prototype in case they are unable to access it on their device via the link.
- If using Figma, turn off the Hotspot Hints:
<https://help.figma.com/hc/en-us/articles/360040318013-Play-your-prototypes>
- Go through the tasks one at a time.
- Don't jump in with follow-up questions too soon. Give them some space and time to explore and embrace the awkward silences.
- If they go too silent for too long, remind them to think out aloud.

- If they ask you a question about how something works, reply with: "What do you think?"

Task 1: Let's get started. This app is called *Pulse*. How you would navigate the start of the app.

Follow-up questions

- What is your first impression?
- What were you expecting? Why?
- What do you think you can or can't do here?
- What is clear or unclear?

Task 2: How would you go about picking or editing your fitness profile

Follow-up Questions

- What were you expecting? Why?
- What do you think you can or can't do here?
- What is clear or unclear?

Task 3: How would you get started with a workout using this App? (recommend doing the easiest one).

Follow-up Questions

- What were you expecting? Why?
- What do you think you can or can't do here?
- What is clear or unclear?

Closing Questions

- **If you had a magic wand, what changes or improvements would you possibly make to this experience?**
